SKILLS

- **Strong:** HTML, CSS, Javascript
- **Experienced:** React, Node, PostgreSQL
- **Tools:** Visual Studio Code, Illustrator, Photoshop, Indesign, Figma, Blender

APPLICATIONS DEVELOPED

Mubo, [GitHub](#)

Application to create, edit, and compile moodboards.

- Used React to create components in order to create and store moodboards/ entries in a database.
- Designed a responsive system with Tailwind to view data retrieved from the database.
- Added functionality to upload image files that are rendered to the page.

Code Journal, [GitHub](#)

Application to add, view, edit, and delete submitted entries.

- Utilized Javascript to create a function that locally stores information for each entry.
- Developed system in HTML & CSS to view stored data.
- Created functionality to edit or delete already-stored data and update on the page.
